OBJECTIVE

Results-driven Software Engineer with a strong foundation in backend development, mobile application design, and full-stack engineering. Proven ability to develop user-centered solutions that streamline business operations and improve data management. Skilled in Java, Python, Flutter, and modern development frameworks with hands-on experience in production environments. Committed to continuous learning and delivering high-quality, scalable software solutions that drive business value.

EDUCATION

STARTHMORE UNIVERSITY | NAIROBI | Bachelor's Degree in Informatics and Computer Science

June 2022 - June 2026

Relevant Coursework: Data Structures and Algorithms, Artificial Intelligence, Database Management, Advanced Database Systems, Software Engineering, Cybersecurity, Human-Computer Interaction, Mobile Application Development

STARTHMORE UNIVERSITY | NAIROBI | Certificate in Data Analytics and Visualization

January 2026 - March 2026

Relevant Coursework: Data Analytics Fundamentals, Data Cleaning and Preparation, Statistical Analysis, Data Visualization, Spreadsheet Analysis (Excel), SQL for Data Analysis, Python for Data Analysis, Business Intelligence Tools (Power BI / Tableau), and Data Interpretation & Reporting.

EXPERIENCE

STUDENT ATTACHEE | (BACKEND ENGINEERING) | INDRA LIMITED

Dates [07/01/2025 - 30/03/2025]

Developed a mobile application using Flutter and Spring Boot to streamline vendor and field surveyor collaboration, enabling real-time communication and task management across distributed teams. Implemented backend services and database optimization that improved operational efficiency and reduced survey turnaround time by facilitating direct data submission from field to central analysis systems.

Collaborated with cross-functional development teams to identify, analyze, and implement system modifications based on client requirements, ensuring solutions aligned with business objectives and user needs. Participated in code reviews, debugging sessions, and deployment processes, gaining hands-on experience in professional software development workflows.

SKILLS & ABILITIES

Programming Languages: Java, Python, HTML, CSS, JavaScript
Frameworks & Tools: Spring Boot, Laravel, Flutter
Mobile Development: Android, iOS (Flutter)
Database Management: Oracle, MySQL
Concepts & Methodologies: Machine Learning, Artificial Intelligence, Object-Oriented Programming, Agile Development
Version Control: Git, GitHub

VOLUNTEER EXPERIENCE

COMMUNITY SERVICE VOLUNTEER | Carmel Catholic School

Dates [14/01/2024 - 14/03/2024]

Contributed to school operations across multiple roles including farm management, food services coordination, and computer lab assistance. Demonstrated adaptability, reliability, and commitment to community development while managing diverse responsibilities in a collaborative environment.

STRENGTHS

Effective Communication | Problem-Solving | Teamwork & Collaboration | Adaptability Critical Thinking | Creative Problem-Solving | Time Management | Self-Motivation & Initiative Quick Learner | User-Centered Design Thinking | Leadership

PROJECTS ([GitHub](#))

INDRA MAP VENDOR | Mobile Application

Developed a mobile application connecting map vendors with field surveyors to streamline material survey operations and resource allocation. Built with Flutter frontend and Spring Boot backend, the solution improved communication efficiency between field teams and vendors, reducing time spent on logistics coordination and material procurement.

SPACE HUB | Web Application

Designed and developed a web platform using Laravel framework that connects users with event venues and spaces. The application features user authentication, booking management, and search functionality, demonstrating full-stack web development capabilities and understanding of business process automation.

SMART NEOS | Mobile Application

Developed a mobile application using Flutter, Java Spring Boot, and Python with machine learning to predict preterm birth risk. The app features early-warning predictions with 92% accuracy and 87% recall, supporting timely interventions and demonstrating skills in mobile development, AI integration, and healthcare-focused problem solving.
